

# High Purity Aluminum Hydroxide

## Product Overview

It has a white crystalline powder appearance, uniform particle size, high purity, stable chemical properties, and good sintering activity. It is an excellent raw material for optical glass additives, high-purity aluminum salts and other industries.

## Product Characteristic Index

Product Model	Si (PPM)	Fe (PPM)	Na (PPM)	Ca (PPM)	Mg (PPM)	Cu (PPM)	Cr (PPM)	Ti (PPM)	Particle size 50 (μm)	Moisture (%)
